Telehandler Operator Training

Genie Telehandler Operator Training – Training Record

The American National Standards Institute (ANSI) and the Canadian Standards Association (CSA) define training as "Instruction to enable the trainee to become a qualified person regarding the task to be performed, including knowledge regarding potential hazards."

Only personnel who have received general instructions regarding the inspection, application and operation of Class 7 Variable Reach Forklifts, commonly known as Telehandlers, including recognition and avoidance of hazards associated with their operation, shall operate a Telehandler. The ANSI/ITSDF B56.6 and CSA B335 standards outline the items to be covered.

This form is provided as an example for use in fulfilling the ANSI and CSA record keeping requirements. Use this form to record completion of Train the Trainer and/or Operator Training on Telehandlers.
